

**A gift from the sun
for your home**

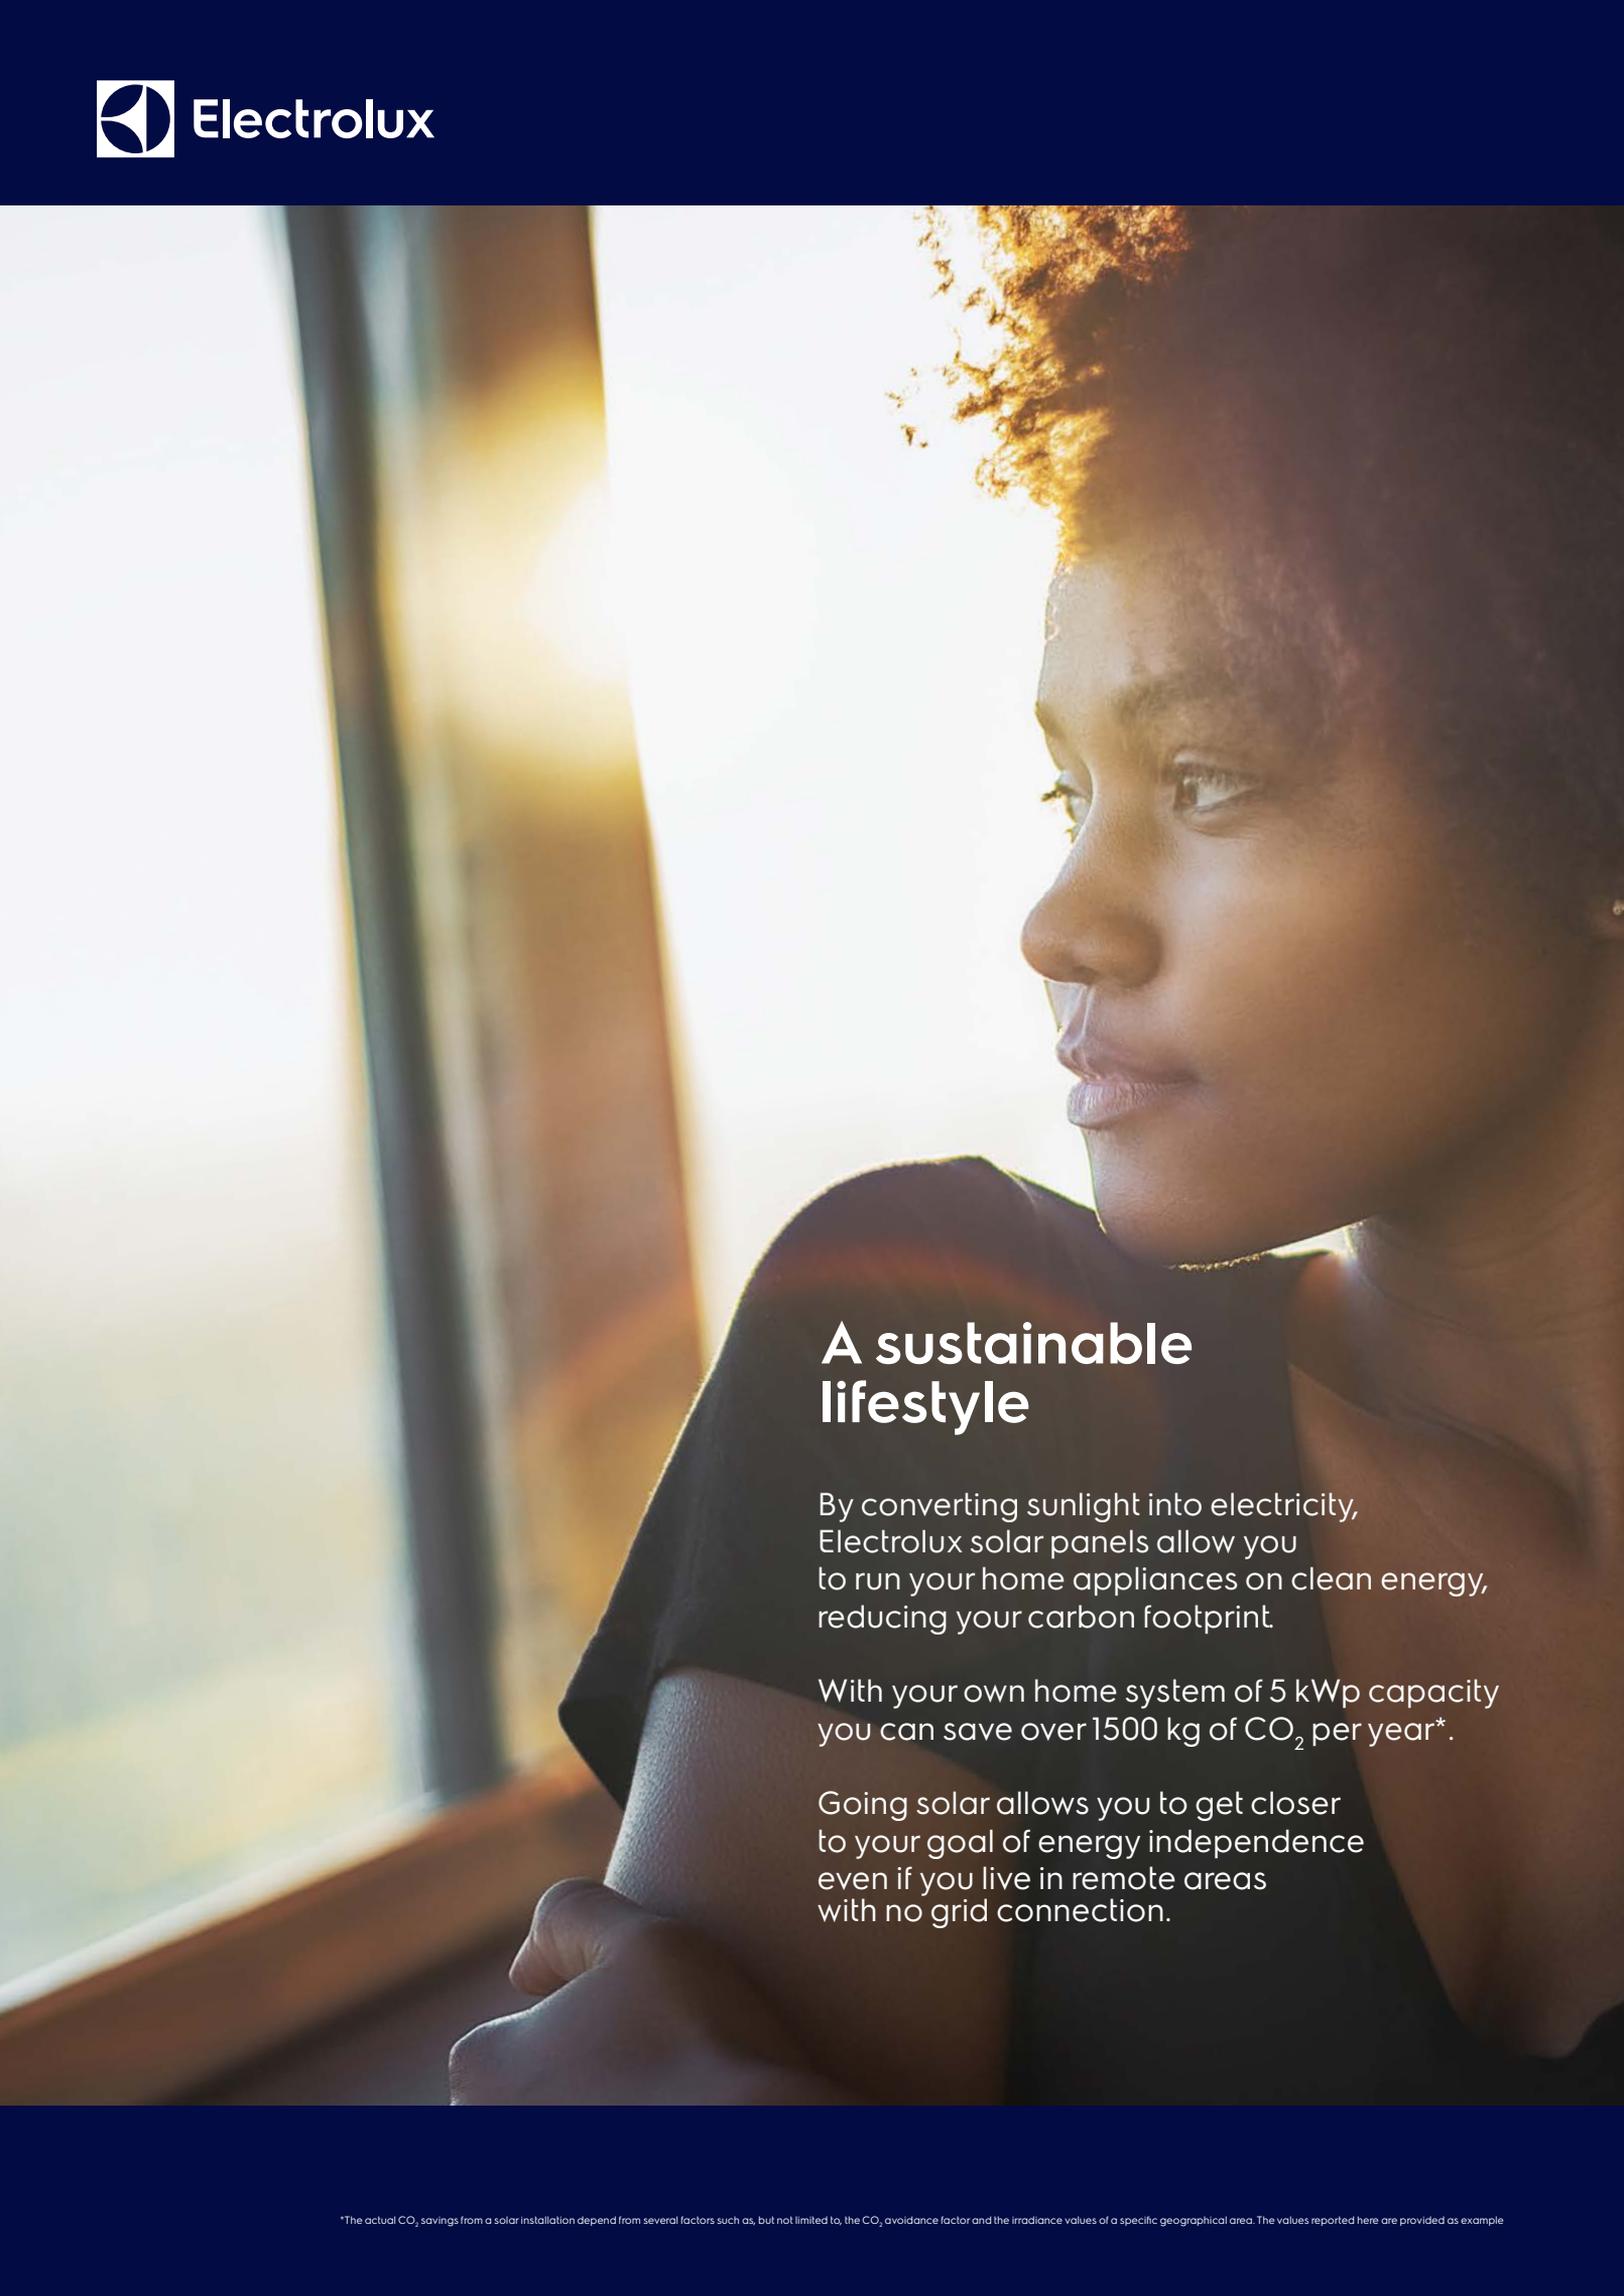

Electrolux
Solar Photovoltaic Products

Solar energy is a gift

Everyday we have the chance to leverage this immense gift called the sun and make our lives more sustainable, without giving up our comfort.

Electrolux solar modules are designed to help you towards your pursuit of a sustainable lifestyle. Changing sunlight into clean energy, so that you change the world.

For better living.

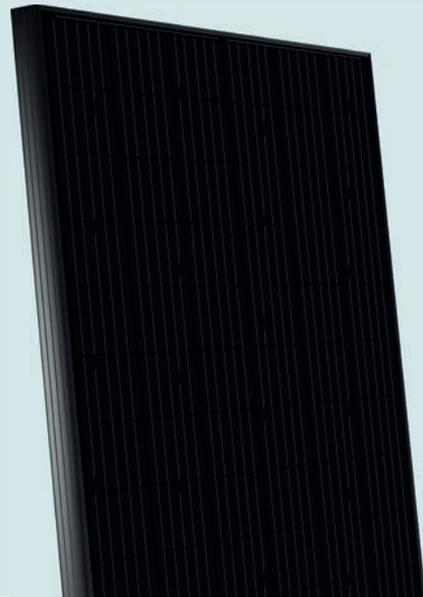

A sustainable lifestyle

By converting sunlight into electricity, Electrolux solar panels allow you to run your home appliances on clean energy, reducing your carbon footprint.

With your own home system of 5 kWp capacity you can save over 1500 kg of CO₂ per year*.

Going solar allows you to get closer to your goal of energy independence even if you live in remote areas with no grid connection.

Sustainable and efficient: your home, powered by solar energy

High efficiency, sleek optics:
module series ES-M661B-(G1) and ES-M721B-(G1)

Electrolux High Efficiency solar modules help you maximize the energy production of your solar installation.

Compact, durable, and with premium aesthetics, Electrolux solar modules optimize your sustainable investment thanks to the latest advancements in solar technology, making your installation more efficient by design.

About us

Since 2015, Solar Solutions has been helping customers worldwide to achieve their sustainability goals.

With a network of selected partners in over 30 countries, we have successfully supported our customers's sustainable aspirations in all business segments -from their home to commercial and utility-scale solar installations.

Throughout this time, we have been delivering high quality solar products (solar modules, inverters and storage) of the premium brand AEG, (www.aeg-industrialsolar.de) entrusted to us in license by Electrolux Group.

Join us

Today we are offering our customers even more ways to become sustainable. The Electrolux brand epitomises quality, forward-thinking, design-led solutions.

Why don't you join us on this exciting journey?
